

Security and Threat Assessment

Benefits

- A rigorous assessment of your internal security capability
- A prioritised list of threats based on your business, industry and digital footprint
- Output aligned to ISO27001, Cyber Essentials and Cyber Security Framework
- Assesses and utilises any existing security metrics or reporting
- Aligns with and assists in managing compliance
- Pragmatic, easy to digest advice to reduce risk

Deliverables

- Strategic advice to address business priorities and evolving security threats
- A threat assessment with clear, prioritised list of internal and external threats and likely threat actors
- A security assessment, signposted to multiple compliance frameworks, and rated using the CMM model
- A summary review, suitable for C-level stakeholders or the board, showing current state of security and highlighting any major risks
- A detailed set of guidance; advice on priority and cost/complexity to address major gaps/risks

ROBERT ROBINSON, DIRECTOR OF NETWORK AND SECURITY SERVICES

All organisations, regardless of sector or size, need to understand two things: the maturity of their internal security capability and the reality of threats to their business. A Security & Threat Assessment is designed around your specific needs and focuses and uses Company85's recognised and repeatable process to provide you with a thorough assessment of the current state and appropriateness of your information security capability.

A threat assessment reviews how an organisation is seen, and may be targeted by attackers and identity where it is most vulnerable to these attacks. It utilises multiple security intelligence sources, including the 'dark web', to establish all attack trends that apply.

Using selected security tools and with alignment to multiple compliance frameworks "out of the box", the security assessment reviews and assesses the organisation's current cyber security posture and operational security capabilities. It can provide you with a full review of your information security at each stage: identify, protect, detect, respond and recover. The assessment will review your internal processes and capabilities, as well as your contracts with external suppliers. It will review existing and planned technical controls, and their placement and effectiveness. We can identify trust boundaries with suppliers, and ensure those relationships assist and do not hinder your security.

Thorough, Useful Output

Company85 will combine the prioritised view of live and relevant threats with this in-depth review of security practice and posture to provide the organisation with a comprehensive view of its level of preparedness, any unmitigated risks, gaps in its capability or policy, and a clear set of recommendations to address them.

Bespoke

All organisations are different; an assessment like this must likewise be tailored for your organisation. Different levels of outsourcing, regulation, size and industry will all have an impact on what the assessment delivers.

About Company85

Company85 is an independent IT services firm which leads change, strips out cost and safeguards information.

Headquartered in London, we provide data centre, workspace, cloud, security and network services to some of the biggest global organisations in the public and private sector across the UK and the world. We have been at the forefront of infrastructure innovation for over 25 years, with an industry recognised methodology that guarantees outcomes, reduces risk and is at least 25% faster and 30% more cost effective than larger consultancies.

Our clients include Associated British Foods; AstraZeneca; Bank of England; BBC; Crawley Borough Council; Financial Times; GSK; JustEat; London City Airport; NBC Universal; NHS; Norton Rose Fulbright; Pearson; Penguin Random House; RBS; Roche; Vocalink; Vodafone and XL Catlin.

- Services Company of the Year Winner, UK IT Awards 2016.
- Security Team of the Year, Winner, Computing Security Excellence Awards 2016.
- Consulting Practice of the Year, Winner, Cyber Security Awards 2015.
- IT Employer of the Year Winner, UK IT Awards 2014.
- Channel Service Provider of the Year, Judge's Commendation, CRN Awards 2016; Finalist, 2014, 2013, 2011.
