

Current State Assessment

A comprehensive review of your IT Infrastructure Service

Benefits

- Understand where improvements to your infrastructure can drive down costs and improve service levels.
- Identify the weaknesses in your infrastructure that are impacting application availability.
- Quantify the potential benefits of further automation for your infrastructure services
- Gain a holistic view assessing people, process and technology
- Assess alignment of your infrastructure roadmap with business need
- Benchmark your IT infrastructure services against best practice

In a nutshell

Company85's infrastructure transformation services provide organisations with a framework with which to assess, plan and deliver the IT infrastructure change that they need to achieve their business objectives. With over 20 years' experience of implementing and managing critical infrastructure for some of the most demanding clients around the globe we know what works and what doesn't and how to get you from a to b without impacting your business.

STUART EDWARDS, HEAD OF IT TRANSFORMATION

The maturing of digital technologies, cloud services and data centre automation tools provide organisations with many options to increase agility, reduce costs and better integrate IT solutions. Our 4D methodology helps organisations prioritise where to invest and how to identify and shape the right solutions.

IT infrastructure managers also face a number of challenges such as; reversing infrastructure technical debt, improving resilience, responding to the increased threat and impact of cyber-attacks, keeping the lights on for existing infrastructure while delivering new agile infrastructures to support the rapid development of new services. Our methodology assesses your maturity in these areas and provides pragmatic solutions to respond to your specific challenges.

A Company85 IT Infrastructure assessment provides CIOs and IT Managers with an in-depth understanding of the operational maturity of their IT infrastructure and identifies key issues and opportunities. With expertise across all facets of IT infrastructure, we provide a rigorous analysis of your estate and produce a detailed framework to pay back technical debt and kick-start transformation initiatives.

Approach and engagement

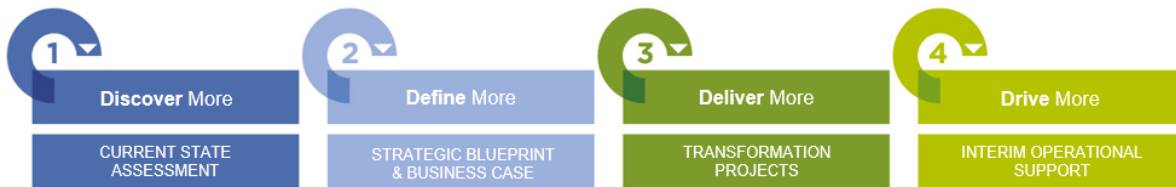

The assessment provides a snapshot of the maturity of people, process and technology across an IT infrastructure and answers key questions about its effectiveness such as:

What are the critical areas that need immediate remediation?

- Are my end user services flexible enough to support required working patterns and information needs of the organisation?
- Are my data centre services agile and efficient and do they meet the demand for new applications and services?
- Does IT provide the required transparency of costs to effectively measure effectiveness?
- Do governance frameworks provide effective protection against current security threats?

Our structured approach uses experienced consultants, with operational exposure across a wide selection of industries and clients, to ensure fast results and alignment with best practice. The approach is customised to reflect business priorities and objectives of each client at commencement of the assessment.

Company85's 4D Methodology

About Company85

Company85 is an independent IT services firm which leads change, strips out cost and safeguards information.

Headquartered in London, we provide data centre, workspace, cloud, security and network services to some of the biggest global organisations in the public and private sector across the UK and the world. We have been at the forefront of infrastructure innovation for over 25 years, with an industry recognised methodology that guarantees outcomes, reduces risk and is at least 25% faster and 30% more cost effective than larger consultancies.

Our clients include Associated British Foods; AstraZeneca; Bank of England; BBC; Crawley Borough Council; Financial Times; GSK; JustEat; London City Airport; NBC Universal; NHS; Norton Rose Fulbright; Pearson; Penguin Random House; RBS; Roche; Vocalink; Vodafone and XL Catlin.
